Sanitation coverage

Proportion of population using safely managed, basic, limited, unimproved sanitation services or practising open defecation, 2015

351 million people in the UNICEF West & Central Africa Region lacked a basic sanitation service in 2015, 122 million of whom practise open defecation

Countries in the region with the highest number of people practising open defecation in 2015

Safely managed sanitation estimate is available for two countries in the region

Urban coverage of basic sanitation services exceeds 50% in 5 countries, rural coverage exceeds 50% in 2 countries

Drinking water coverage

Proportion of population using safely managed, basic, limited, unimproved water services or surface water, 2015

181 million people in the UNICEF West & Central Africa Region lacked a basic drinking water service in 2015, 78% of whom live in rural areas

Countries in the region with the highest number of people who did not use a basic water service in 2015

• Safely managed drinking water estimate is available for four countries in the region

Safely managed - national

• Urban coverage of basic drinking water services exceeds 50% in 24 countries, rural coverage exceeds 50% in 13 countries

Basic - national

Hygiene coverage

Proportion of population with basic, limited handwashing facilities or no facility in 2015

426 million people in the UNICEF West & Central Africa Region lacked a basic handwashing facility in 2015, 321 million of whom had no facility

Nigeria, 158

Democratic Republic of the Congo, 74

Cameroon, 23

Ghana, 22

Côte d'Ivoire, 18

Burkina Faso, 16

Rest of the Region, 10

Countries in the region with the highest number of people without handwashing facilities in 2015

there are no countries for which urban or rural coverage of basic handwashing facilities exceeds 50%

Basic - urban

Basic - rural

<25% 25-50% 51-75% 76-90% >90% Insufficient data Not applicable

Inequalities

Trends

Drinking water

In 2015, 81.7% of the urban population and 46.5% of the rural population used a basic drinking water service.

Sanitation

In 2015, 37% of the urban population and 18.7% of the rural population used a basic sanitation service.

Open defecation

In 2015, 9.5% of the urban population and 38.4% of the rural population practised open defecation.

DRINKING WATER

In 2015,

- 71 per cent of the global population (5.2 billion people) used a **safely managed** drinking water service; that is, one located on premises, available when needed and free from contamination.
- Eight out of ten people (5.8 billion) used improved sources with **water available when needed**.
- Three out of four people (5.4 billion) used improved sources **located on premises**.
- Three out of four people (5.4 billion) used improved sources **free from contamination**.
- 844 million people still lacked even a **basic** drinking water service.
- 263 million people spent over 30 minutes per round trip to collect water from an improved source (a **limited** drinking water service).
- 159 million people still collected drinking water directly from **surface water** sources, 58% lived in sub-Saharan Africa.

SANITATION

In 2015,

- 39 per cent of the global population (2.9 billion people) used a **safely managed** sanitation service; that is, excreta safely disposed of in situ or treated off-site.
- 27 per cent of the global population (1.9 billion people) used private sanitation facilities connected to sewers from which **wastewater was treated**.
- 13 per cent of the global population (0.9 billion people) used toilets or latrines where excreta were **disposed of in situ**.
- Available data were insufficient to make a global estimate of the proportion of population using septic tanks and latrines from which excreta are **emptied and treated off-site**.
- 2.3 billion people still lacked even a **basic** sanitation service.
- 600 million people used a **limited** sanitation service.
- 892 million people worldwide still practised **open defecation**.

HYGIENE

In 2015,

- 70 countries had comparable data available on handwashing with soap and water, representing 30 per cent of the global population.
- Coverage of **basic handwashing** facilities with soap and water varied from 15 per cent in sub-Saharan Africa to 76 per cent in Western Asia and Northern Africa, but data are currently insufficient to produce a global estimate, or estimates for other SDG regions.
- In Least Developed Countries, 27 per cent of the population had basic handwashing facilities with soap and water, while 26 per cent had handwashing facilities lacking soap or water. The remaining 47 per cent had no facility.
- In sub-Saharan Africa, three out of five people with basic handwashing facilities (89 million people) lived in urban areas.
- Many high-income countries lacked sufficient data to estimate the population with basic handwashing facilities.
